

## SUNOCO ULTRA CHISEL PASTE

### OVERVIEW

SUNOCO ULTRA CHISEL PASTE is a specialty grease formulated specifically for hydraulic hammers under heavy use. Enhanced with solid frictional modifiers, SUNOCO ULTRA CHISEL PASTE provides superior lubrication over a wide temperature range for lower downtime and longer tool life.

### FEATURES & BENEFITS

SUNOCO ULTRA CHISEL PASTE is a superior hydraulic hammer lubricant. Its calcium sulfonate base resists water washout and shearing has high load capacity (800 Kgf. Weld Point) and shock handling and is resistant to the effects of high temperatures. SUNOCO ULTRA CHISEL PASTE contains solid lubricity and EP agents to protect surfaces from wear under extreme duress and provide optimum lubrication under the harshest weather and operational conditions.

### TYPICAL PROPERTIES

Product Code	99903
NLGI Grade	2
Soap Type	Calcium Sulfonate Complex
Color	Copper/Gray
Viscosity, cSt @ 40 °C	225 cSt
Viscosity, cSt @ 100 °C	19 cSt
Operating Temp Range, °F	-20° - 400°
Penetration 60 Strokes	280
Dropping Point	500°F min
Four Ball EP Weld Point	800 Kgf.
Four Ball EP LWI	77
Four Ball EP Scar dia.	0.60 mm
Solids Content, min.	14%
Corrosion Protection	PASS

### APPLICATIONS

SUNOCO ULTRA CHISEL PASTE is recommended for the lubrication of tools, bushings and pistons on hydraulic hammers and breakers from all OEMs. It will prevent wear, extend tool life and help lower operational expenses versus other grease products. SUNOCO ULTRA CHISEL PASTE is easily pumped while still maintain excellent adhesion and does not contain any heavy metals to be an environmental concern. Can be used as a heavy-duty multi-purpose grease to lubricate construction and mining equipment, utility, agricultural, marine and other outdoor equipment, bushings, pins, couplings, chassis parts, and various other industrial, commercial and vehicular components in all climates.
