

SUNOCO PARAFFINIC PROCESS OIL 70P (GROUP I)

OVERVIEW

Sunoco Paraffinic Process Oil 70P is a hydrotreated / solvent dewaxed paraffinic process oil. This premium product is a high viscosity index oil that exhibits exceptional oxidation stability, low volatility, and thermal stability.

FEATURES & BENEFITS

- High resistance to forming emulsions
- Outstanding stability
- Compatible with other mineral-based lubricants

APPLICATIONS

Sunoco Paraffinic Process Oil 70P is recommended for many circulation oil systems or the lubrication of both cylinders and running gears of single-acting compressors.

TYPICAL PROPERTIES

Product Code	1143
PROPERTY	70P
Appearance	Clear & Bright
Viscosity, cSt @ 40 °C	11.1
Viscosity, cSt @ 100 °C	2.77
Viscosity Index	87
Flash Point, °F	355
Pour Point, ° F	0
Color	<0.5
Gravity, ° API	34.7
