

SUNOCO HTO-F

OVERVIEW

SUNOCO HTO-F is a heat transfer oil flushing fluid for startup and maintenance of heat transfer systems. This high flash petroleum product contains little to no impurities and serves as an excellent media for general system cleaning, flushing of residual debris from SUNOCO HTO-C cleaning fluid, or as a prep fluid to flush manufacturing burrs from new equipment installations.

FEATURES & BENEFITS

SUNOCO HTO-F has inherently better solvency than most other flushing oils allowing for easier removal of contaminants. Its high flash point allows for circulation without completely shutting down of most heat transfer systems. HTO-F is an extremely cost effective solution to system cleaning and maintenance.

TYPICAL PROPERTIES

Product Code	1103
Appearance	Clear & Bright
Viscosity, cSt 40°C	20.2
Pour Point, °F	-55
Flash Point, COC, °F	345

APPLICATIONS

SUNOCO HTO-F can be used in any heat transfer system as a flushing or light cleansing agent. Specifically designed to work with the SUNOCO HTO family of products, SUNOCO HTO-F is safe to use in any heat transfer system of any size or make.
