Transmissions in U.S. Market**

ULTRA FULL SYNTHETIC MULTI-VEHICLE ATF

-  SUPERIOR ANTI-SHUDDER
-  IMPROVED WEAR PROTECTION
-  HIGH SHEAR STABILITY

Ultra Full Synthetic Multi-Vehicle ATF is a new, specially formulated product designed to meet stringent requirements for both CVT and Stepped Automatic transmissions. This unified ATF boasts exceptional shear stability for maintaining steel-on-steel friction (between belt/chain and variator) in CVTs along with superior anti-shudder and hardware protection for Stepped Automatic Transmissions.

Complete application guide available online at www.sunocolubes.com
